Affordable Perlick Quality

The perfect balance between affordable price and quality means that Perlick Topshelf Underbar Stainless Steel equipment is now the smartest choice for all your underbar needs.

Compare our stainless steel equipment with others in the industry. We're sure you'll see the difference right away. The quality stands out. That's because Perlick pays close attention to detail--like expert welds that are trimmed and polished so they're virtually invisible--and drainboards made of embossed stainless steel--not just a piece of perforated metal.

We've made design improvements to the Topshelf line, so installing Perlick underbar modules on the job site is a snap. Like our new legs that twist on easily without tools, saving installation time and money; yet they still provide unparalleled strength and stability. And Perlick uses only the highest quality tough, thermoplastic feet that will never rust or corrode.

We've been the leading manufacturer of stainless steel underbar equipment for nearly 40 years. We're so certain you'll appreciate the Perlick difference, we'll stake our reputation on your complete satisfaction. And that's a promise from a company you can rely on.

TOPSHELF

Underbar Stainless Steel Equipment

Topshelf Underbar Stainless Steel Modules are available in three profiles.
TS Series (18 1/16" deep) TSD Series (24" deep) or TSS Series (for Thru-the-Bar applications)

TSD Series

TSS Series

We call them workboards...

...because it's where the work takes place in a successful bar operation. From glass washing or hand washing to storing condiments, liquor or ice, Topshelf stainless steel underbar modules will help make your bar more efficient.

The Heart of the Bar

Back in the 70's Perlick's experts created an ice chest with a sealed-in cold plate to chill postmix beverages. Today they are the standard in the industry.

Perlick's innovative team has reinvented the cold plate ice chest and taken it to a new level. We've developed a revolutionary new design with a patented, concealed cold plate. Its smooth interior makes it the cleanest, most sanitary ice chest available. And with an ABS dent-proof ledge plus a competitive price, the Perlick cold plate ice chest is the best value around.

Complete Versatility & Efficiency

With a wide variety of modules to choose from and hundreds of possible configurations, Perlick Topshelf underbar stainless steel equipment has everything you need.

Our global network of bar experts will help you select and design an efficient equipment lineup for your working bar. Call us today.
